## PARTNERS

### Maine Board of Pesticides Control

Funding for this program, in part, was provided by the **U.S. Environmental Protection Agency** under Section 319 of the Clean Water Act. The funding is administered by the **Maine Department of Environmental Protection** in partnership with EPA.

*UNH Cooperative Extension programs and policies are consistent with pertinent Federal and State laws and regulations on non-discrimination regarding age, color, handicap, national origin, race, religion, sex, sexual orientation, or veterans status.*

This program is intended for people who are policy makers or are in the business of developing, maintaining, or preserving shoreland properties, and others who are concerned about the impacts of landscaping on water quality, including:

- Landscape designers, contractors and maintenance professionals in Maine and New Hampshire
- Members of watershed groups and/or conservation commissions
- Shoreland property owners and builders
- Water districts, municipal employees, town boards
- Decision-makers who need to understand ecological approaches to landscaping for water quality protection

This will be the sixth training series for Landscaping at the Water's Edge. What previous participants have said:

- I have a much better understanding of the why's and how's which has allowed me to better manage a buffer restoration project I am now implementing.
- Future plantings near the water's edge will be guided by the information I learned from the class.
- Heavy rains this summer have resulted in an assessment of run-off and the impact on the lake. Steps will be taken to slow the velocity of the water as recommended from the course and add suitable plants (low-bush blueberries for example).

QUESTIONS? PLEASE CALL SUZANNE HEBERT AT 862-3200.

No person shall be denied access to the information provided through this program because of the inability to pay. A limited number of scholarships are available to individuals unable to pay.

**ADA Statement:** Persons requiring special accommodations should call 603-862-3200 two weeks prior to the workshop date so that proper consideration can be given to the request.
