

**Rice Public Library
Children's Garden Construction
Addendum 1
September 22, 2023**

This addendum is to respond to questions received by the September 21 deadline.

Please remember to acknowledge receipt of all addenda in your proposal submission.

1. Are drainage and rain garden part of the construction scope?

Site drainage and the rain garden are components of the construction scope. See construction specifications.

2. What is the water source for the water feature?

The water feature will be supplied by connection to the public water utility service. The contractor will determine the best location to connect to the service on the site.

3. Confirm the trees to be moved and replanted as part of the project?

One small dogwood and one small red bud are to be moved and replanted on site. All other trees are to be removed, unless otherwise specified in the plans.

4. What should be done with plant material identified as "preserved for use by other"?

Any plant material that has been identified as "preserved for use by other" is to be placed in containers and moved to the south lawn of the property. The Town will then assume responsibility for replanting these materials and their ongoing condition/survival.

5. Confirm the project timeframe desired by the Town.

The Town is seeking for this project to be complete no later than the end of calendar year 2024.
