

**Town of Kittery Wastewater Treatment Department**  
**18 Dennett Road**  
**Kittery, Maine 03904**

April 6, 2015

Dear Property Owner,

Sanitary sewers will be constructed in your area in the near future. To minimize your cost of connecting to the system in the future, we need your assistance in determining the best location and depth for your service connection pipe. The Town of Kittery will construct a service connection pipe to your property line from the main line sewer in the street. You will be responsible for constructing the pipe from your property line to your house or business.

**Please indicate on the attached form where you would like the service connection to enter your property from the main sewer line in the street, and at what depth.** It is important to avoid any other utilities that may already be servicing your property, such as water or gas. Please feel free to sketch any distinguishing dimensions and details such as driveways and trees on the diagram. If you need assistance in determining the best location for your service connection, please check the box on the form, indicate a time when a representative might meet with you, **and return the form to George Kathios Superintendent of Wastewater Services, Town of Kittery Wastewater Treatment Department 200 Rodgers Road, Kittery, Maine 03904**

**Additionally the Resident Engineer from Kleinfelder, Frank W. Lyon will be on site during the construction process to answer your questions and assist you to determine your best alternative. Please feel free to contact him by cell phone at 508 962-8130 or email to [flyon@kleinfelder.com](mailto:flyon@kleinfelder.com).**
